### Approvals and Markings

### Applications

- For switching lamp loads
- Input interface relay, e.g. for activation of PLC
- Output interface relay, e.g. for PLC-controlled loads

### Function

The contacts are actuated with an armature via a plunger. After the exciting voltage has dropped, a spring returns the armature (which is connected to the plunger) to its home position. The contacts can be actuated manually via a pushbutton on the front as well. The pushbutton acts at the same time as an operating position display. The contacts are closed when the pushbutton is pressed. The black pushbutton is flush with the front edge when there is no current.

**Note:** IL devices have 2, IN devices have 3 pushbuttons on the front. These are **not** linked together. The pushbuttons only activate the contact shown on the front under the button.

### Indicators

Pushbutton: Pressed, when the relay is supplied with current

operating position display

• Output: 2 changeover contacts

• Nominal voltage U<sub>N</sub>: AC 230 V

• Width: 17.5 mm

### Variants

**I\_ 8701. \_ \_ /001:** For switching low loads up to maximum of 6 VA/W at 0.3 ... 60 V / 1 ... 300 mA  
The contacts also permit the maximum switching current.

However, since the gold plating is burnt off at this current level, the unit is no longer suitable for switching low loads again afterwards.

**I\_ 8701. \_ \_ /002:** For U<sub>N</sub> > 100 V DC or AC  
Can be activated with 2-wire initiators, permissible residual current ≤ 3 mA. Max. 6 glow lamps (0.5 mA each) are possible parallel to the mains button.

**I\_ 8701. \_ \_ /033:** NO contacts with manual interlocking.  
This allows a mechanical locked actuation without electro magnetic continuous operation.

#### Only for devices with NC or NO contact:

**I\_ 8701. \_ \_ /003:** 3 mm contact opening

**I\_ 8701. \_ \_ /006:** 6 mm contact opening

For switching large inductive direct current voltage loads (DC 220 V, L/R = 30 ms)

**IK 8701. \_ \_ /007:** For switching lamps with parallel compensation, e.g. HQ lamps (only 1 or 2 NO contacts).  
Maximum parallel compensation 100 µF

#### Only for DC devices:

**I\_ 8701. \_ \_ /005:** Contacts with 5µm gold plating for switching small loads.

With protection diode to protect against wrong polarity and recovery diodes to reduce switching spikes, plus on **A2+**

**I\_ 8701. \_ \_ /008:** With protection diode to protect against wrong polarity and recovery diodes to reduce switching spikes, plus on **A2+**

**I\_ 8701. \_ \_ /013:** With recovery diodes to reduce switching spikes, plus on **A2+**; contact gap 6 mm

**I\_ 8701. \_ \_ /024:** With protection diode to protect against wrong polarity and recovery diodes to reduce switching spikes, plus on **A1+**
